White-backed Swallow M
Welcome Swallow C
Tree Martin C

Large flocks of Carnaby's Black-Cockatoo can be seen in Yanchep National Park, especially in the non-breeding season (late spring to midwinter). Some birds, probably mostly immature, remain in the area throughout the year. In recent years small numbers have bred in Tuart trees in the park.

WHAT IS BIRDS AUSTRALIA?

Birds Australia is a non-profit organisation working for the enjoyment, study and conservation of Australia's birds.

The Western Australian members of Birds Australia are state-wide and are offered a variety of activities and services including conservation and research projects, excursions, camp-outs, bird surveys and social activities.

We also have a library, books for sale and information about birds.

To view our full range of bird guides and bird lists, visit our web site.
