

# School Activities

BirdLife Western Australia offers the following activities for schools.

- Audio visual presentations about the common birds around the school.
- Guided walks for students around the school. We provide the binoculars.
- Information about endangered, endemic or introduced species.
- Question and answer sessions with classes.
- Static displays for the school library.

BirdLife Western Australia is a volunteer organisation. We appreciate a small donation for the use of the binoculars since these are subject to wear and tear in the hands of inexperienced users.

Contact our Schools Liaison Officer Rod Smith for more details about how we can help your school to further understand the environment around you.
