

## Native plant species used by Carnaby's Black-Cockatoos

### Food Species

#### Family Proteaceae

| Genus     | Species                 | Common name                 | part eaten     |  |
|-----------|-------------------------|-----------------------------|----------------|--|
| Banksia   | <i>ashbyi</i>           | Ashby's Banksia             | flowers, seeds |  |
|           | <i>attenuata</i>        | Slender Banksia             | flowers, seeds |  |
|           | <i>grandis</i>          | Bull Banksia                | flowers, seeds |  |
|           | <i>littoralis</i>       | Swamp Banksia               | flowers, seeds |  |
|           | <i>menziesii</i>        | Firewood or Menzies Banksia | flowers, seeds |  |
|           | <i>verticillata</i>     | Granite Banksia             | flowers, seeds |  |
|           | <i>tricuspis</i>        | Lesueur Banksia             | flowers, seeds |  |
| Dryandra  | <i>aff incircioides</i> |                             | seeds          |  |
|           | <i>fraseri</i>          | no common name              | flowers, seeds |  |
|           | <i>nivea</i>            | Couch Honeypot              | flowers, seeds |  |
|           | <i>nobilis</i>          | Golden Dryandra             | seeds          |  |
|           | <i>praemorsa</i>        | Urchin or Cut-leaf Dryandra | flowers, seeds |  |
|           | <i>sessilis</i>         | Parrot bush                 | flowers, seeds |  |
|           | <i>speciosa</i>         | Shaggy Dryandra             | flowers, seeds |  |
| Grevillea | <i>apiculoba</i>        | Subsp. Digitata??           | flowers, seeds |  |
|           | <i>armigera</i>         | Prickly Toothbrush          | flowers, seeds |  |
|           | <i>paniculata</i>       | Kerosene Bush               | seeds          |  |
|           | <i>paradoxa</i>         | Bottlebrush Grevillea       | seeds          |  |
|           | <i>petrophiloides</i>   | Pink Poker                  | seeds          |  |
|           | <i>hookerana</i>        | Black Toothbrush            | seeds          |  |
| Hakea     | <i>auriculata</i>       |                             | seeds          |  |
|           | <i>circumalata</i>      |                             | seeds          |  |
|           | <i>conchifolia</i>      | Shell-leaved Hakea          | seeds          |  |
|           | <i>crassifolia</i>      |                             | seeds          |  |
|           | <i>cyclocarpa</i>       |                             | seeds          |  |
|           | <i>falcata</i>          |                             | seeds          |  |
|           | <i>gilbertii</i>        | no common name              | seeds          |  |
|           | <i>incrassata</i>       | Golfball or Marble Hakea    | seeds          |  |
|           | <i>lissocarpha</i>      | Honeybush                   | seeds          |  |
|           | <i>multilineata</i>     | Grass leaf Hakea            | seeds          |  |
|           | <i>obliqua</i>          | Needles and Corks           | seeds          |  |
| Hakea     | <i>prostrata</i>        | Harsh Hakea                 | seeds          |  |
|           | <i>ruscifolia</i>       | Candle Hakea                | seeds          |  |
|           | <i>scoparia</i>         | no common name              | seeds          |  |
|           | <i>sulcata</i>          | Furrowed Hakea              | seeds          |  |
|           | <i>trifurcata</i>       | Two-leaved Hakea            | seeds          |  |
|           | <i>undulata</i>         | Wavy-leaved Hakea           | seeds          |  |
|           | <i>varia</i>            | Variable-leaved Hakea       | seeds          |  |
|           | <i>laurina</i>          | Pincushion Hakea            | Seeds          |  |
| Isopogon  | <i>scabriuscula</i>     | no common name              | seeds          |  |
| Lambertia | <i>multiflora</i>       | Many flowered honeysuckle   | flowers, seeds |  |

## Food species (cont)

### Family Myrtaceae

| Genus       | Species           | Common name                     | part eaten                |  |
|-------------|-------------------|---------------------------------|---------------------------|--|
| Eucalyptus  | <i>marginata</i>  | Jarrah                          | seeds                     |  |
|             | <i>totdiana</i>   | Coastal Blackbutt, Prickly Bark | seeds                     |  |
|             | <i>wandoo</i>     | Wandoo                          | flowers                   |  |
| Corymbia    | <i>colophylla</i> | Marri or redgum                 | flowers, seeds,<br>nectar |  |
| Callistemon | <i>viminalis</i>  |                                 | nectar                    |  |

Principle information source: HANZAB.

### Tree species used for nesting hollows

| Genus      | Species              | Common name         |
|------------|----------------------|---------------------|
| Eucalyptus | <i>salmonophloia</i> | Salmon Gum          |
|            | <i>wandoo</i>        | Wandoo or White Gum |
|            | <i>longicornis</i>   | Red Morrell         |
|            | <i>loxophleba</i>    | York Gum            |
|            | <i>gomphocephala</i> | Tuart               |
|            | <i>occidentalis</i>  | Swamp Yate          |
| Corymbia   | <i>calophylla</i>    | Marri or Red Gum    |

#### Notes:

The species listed are those that Carnaby's Black-Cockatoo have been recorded feeding on

It is very likely they will also feed on similar woody-fruited native species to these.

If you observe Carnaby's Black-Cockatoos feeding on other species please let Birds Australia WA know.

For greatest success when growing plants for Carnaby's Black-Cockatoo check the suitability of these species to your area and soil type and use local provenance seed.
